

eLink-CPOE™

Electronic Health Record compatible products from LabSoft, Inc.

eLink-CPOE (computerized provider order entry) is a web service application for laboratory test order entry that allows any clinical provider with web access and active user IDs and passwords to place clinical laboratory orders to national reference laboratories.

This service is provided in conjunction with an electronic or personal health record (EHR/PHR) application to allow transmittance of lab test orders electronically and conveniently to the designated receiving reference lab. It can be enhanced with LabSoft's LabSync, and TestTrac products for greater functionality.

eLink Web Services also has available multiple complementary applications to enhance the lab connectivity process.

Typical features include:

- Quick and easy application access through any Internet location
- Can be customized and embedded in virtually any software application
- Total and complete system networking and integration capabilities
- No end-user upgrade or operational maintenance required
- Full 128K encryption security and HIPAA compliant
