

# eLink-RBOABN™

Electronic Health Record compatible products from LabSoft, Inc.

eLink-RBOABN is a web-service from LabSoft, Inc. that gives electronic health record (EHR) vendors the ability to provide their clients with immediate alerts to potential reimbursement/payment rejections for all Medicare lab profiles and tests ordered.

Clinicians may subscribe to the eLink-RBOABN service through their EHR vendor. Once interfaced, LabSoft will provide the EHR application with instant access to all current and updated local Medicare reimbursement rules. As subscribing clients order Medicare lab tests, e-Link-RBOABN will automatically check them against reimbursement rules such as; ICD-9 coding, test frequency and Medicare test denial.

Should a particular test or tests not qualify for payment, the EHR application will be immediately alerted so that appropriate corrective action can be taken

Typical features include:

- Quick and easy setup/connection using web based technology

- Immediate alerts to enhance patient work flow and provider productivity

- Service flexibility with no minimum contract lengths or usage requirements
