Diabetes Mellitus

[Click here for information about disease management](#)

Impression Diagnosis: Diagnosis Date: Diagnosis Type:

Enrollment:

- DM 1 - HbA1c Management - Diabetes patient with one or more 1 A1c test (s)
- DM 2 - HbA1c Control - Diabetes patient with most recent A1c level > 9% (poor control)
- DM-3 - Blood Pressure Management - Diabetes patient having most recent blood pressure measurement < 140/90 mm Hg
- DM-4 - Lipid Measurement - Diabetes patient having an LDL cholesterol test during visit
- DM-5 - LDL Cholesterol Level - Diabetes patient having most recent LDL cholesterol level < 130 mg/dL
- DM-6 - Urine Protein Testing- Diabetes patient having a test for microalbumin or evidence of medical attention for existing nephropathy (diagnosis of nephropathy or documentation of microalbuminuria or albuminuria)
- DM-7 - Eye Exam - Diabetes patient receiving a dilated eye exam or evaluation of retinal photographs by an optometrist or ophthalmologist (During prior year if patient is at low risk for retinopathy. Patient is considered low risk if: 1) not taking insulin, 2) has A1c of < 8%, and 3) has no evidence of retinopathy in the past year)
- DM-8 - Foot Exam - Diabetes patient receiving a complete foot exam (visual inspection, sensory exam with monofilament, and pulse exam)

Heart Failure

Impression Diagnosis Diagnosis Date Diagnosis Type

Enrollment:

- HF1 - Left Ventricular Function (LVF) Assessment Heart Failure - Patients who have quantitative or qualitative results of LVF assessment recorded.
- HF-2 - Left Ventricular Function Testing - Patients hospitalized within the current year for HF who have had left ventricular ejection fraction testing
- HF-3 - Weight Measurement Heart Failure - Patients with weight measurement recorded during visit
- HF-4 - Blood Pressure Screening Heart Failure - Patients with blood pressure measurement taken during visit
- HF-5 - Patient Education HF - Patients receiving education on disease management and health behavior changes during visit
- HF-6 - Beta-Blocker Therapy - Patients who also have LVSD and were prescribed beta-blocker therapy
- HF-7 - ACE Inhibitor Therapy -Patients who also have LVSD and were prescribed ACE Inhibitor Therapy
- HF-8 - Warfarin Therapy for Patients with Atrial Fibrillation - Patients who also have paroxysmal or atrial fibrillation and were prescribed warfarin therapy
